PREVIEW Low Resolution

SYLVIVS LEOPOLD WEISS was born in Breslau in 1686 and died in Dresden in 1750. His father Johann Jacob was a talented musician and theorbo player, and both his brother Johann Sigismund and his own son Johann Adolphus were well-known lutenists.

As a young man Sylvius Leopold went with the Polish Prince Alexander Sobieski to Rome, living there for some six years until the prince's death in 1714. After a short stay at the Court of Hesse-Cassel, he then went back to Düsseldorf.

In 1717 he obtained the post of Court Lutenist to the Elector of Saxony and resided thereafter in Dresden. He was included in the band of the twelve best musicians which the Court sent to Vienna in 1718.

Ernst Theophile Baron, a contemporary musician, writes in his book on the lute (*Historisch-theoretische praktische Untersuchung des Instruments der Lauten*, 1753) that Weiss was famous for his ability to play fugues, and that few organists could play fugues so well as he could on his lute. While at Dresden he is said to have competed in improvisation with J. B. Bach, who was a personal friend, and he was considered by his contemporaries as the greatest lute player of his time.

Weiss played on the large 13-course lute tuned in D minor (as shown below), which was in vogue towards the end of the 17th century.

The lute instrument had 6 courses on the finger board, the remaining 7 being free basses, the tuning of which was varied according to the key of the piece. The tablature of Johann Boscchi, and the tablature that Weiss's lute had, were written on 7 strings on the finger board although the 7th was rarely struck. Sylvius Leopold Weiss left 11 collections of solos, 10 trios, and 10 concertos, all in Ms. tablature. In recent years these have been transcribed into notation in publications such as *Das Erbe Deutscher Musik*.

Some transcriptions for the guitar have been made from Ms. tablature in the British Museum.

When such an arrangement is necessary, and generally a change of position to another key. Many of these lute pieces when transposed can nevertheless be very faithfully presented on the guitar.

The manuscript carries no indication of tempo or expression so that those given in these transcriptions are editorial.
